

How to scan PDFs on iOS

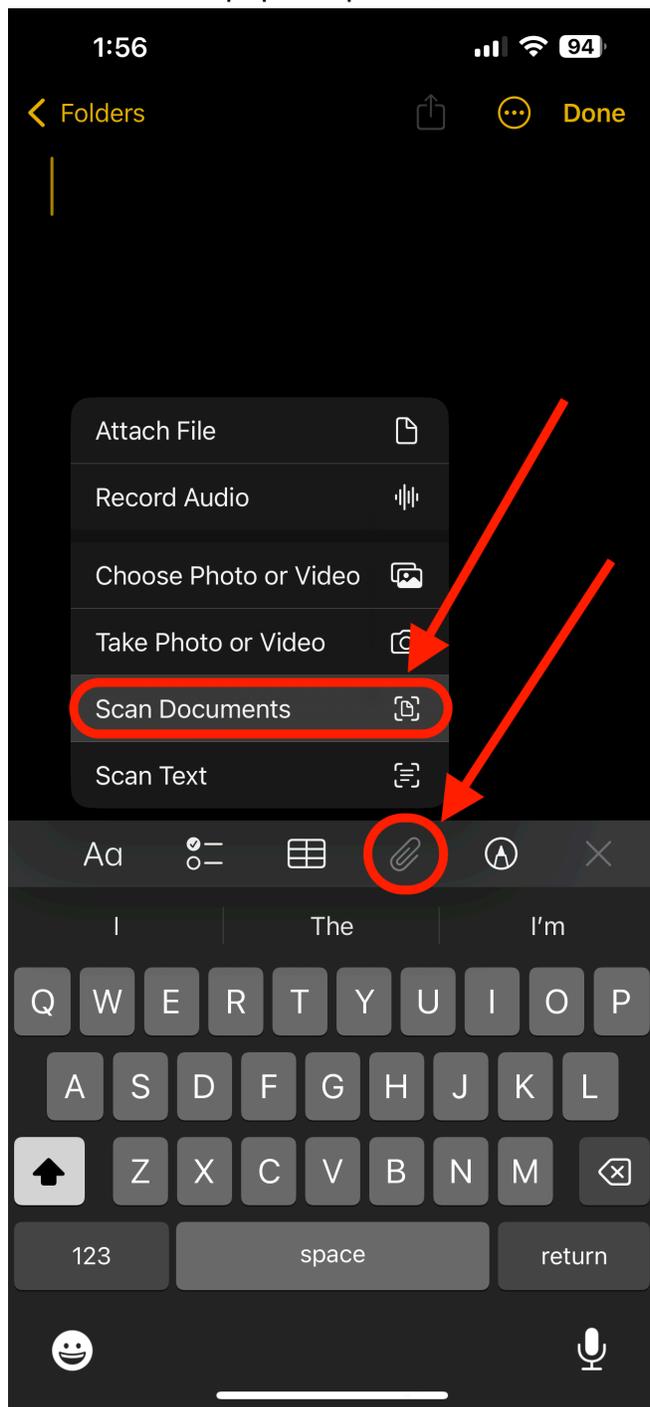

1. First look for the "Notes" app on your phone, you can use the search feature to find it

2. Once in the app, click on the "New note" icon on the bottom right hand side

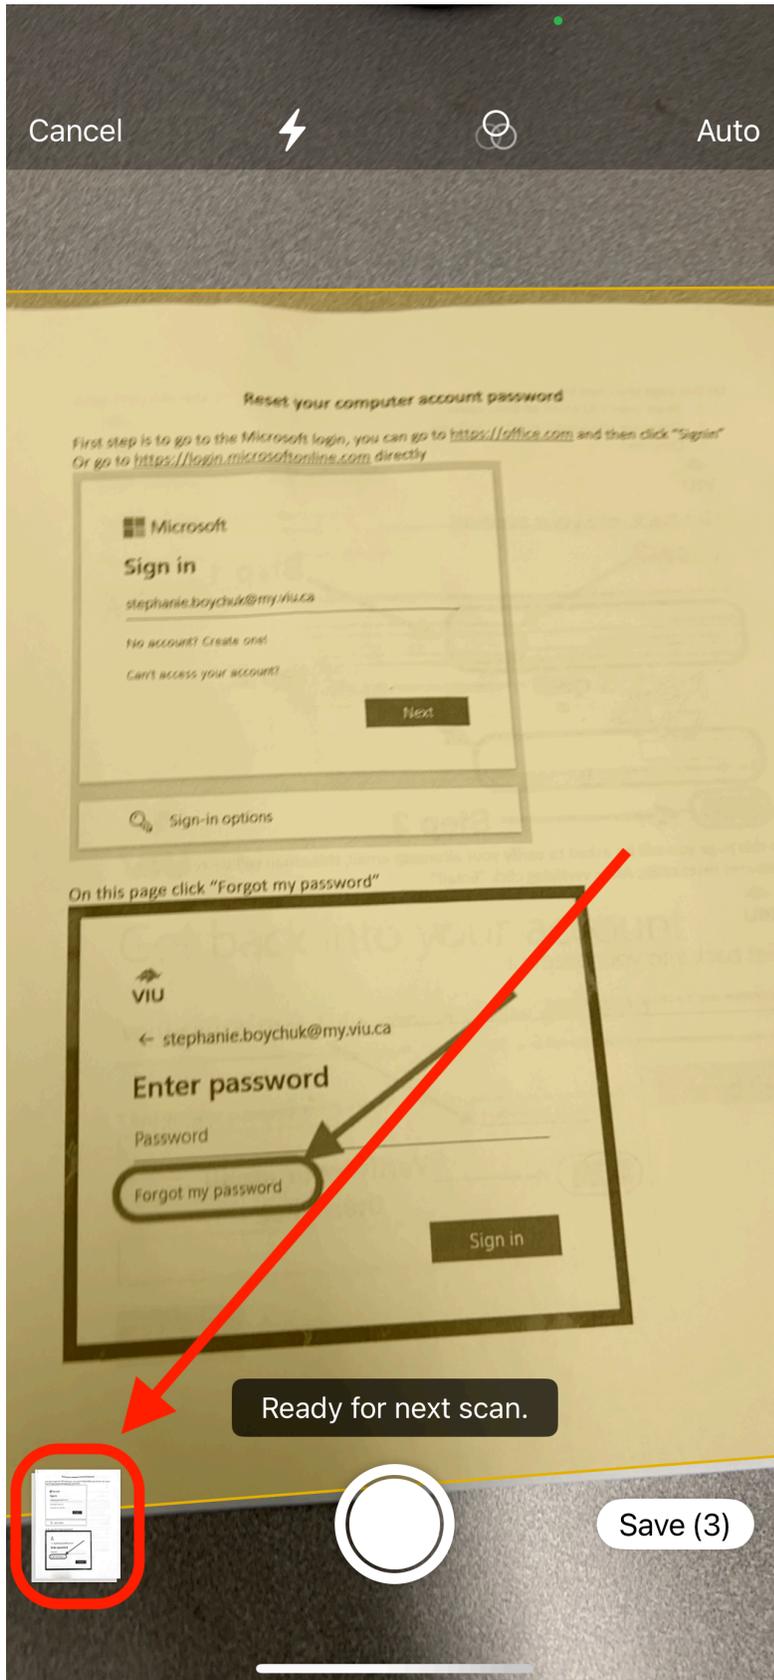

3. Now select the paper clip icon, and then select "Scan documents"

4. Now position the document in the frame, it will automatically start taking pictures.

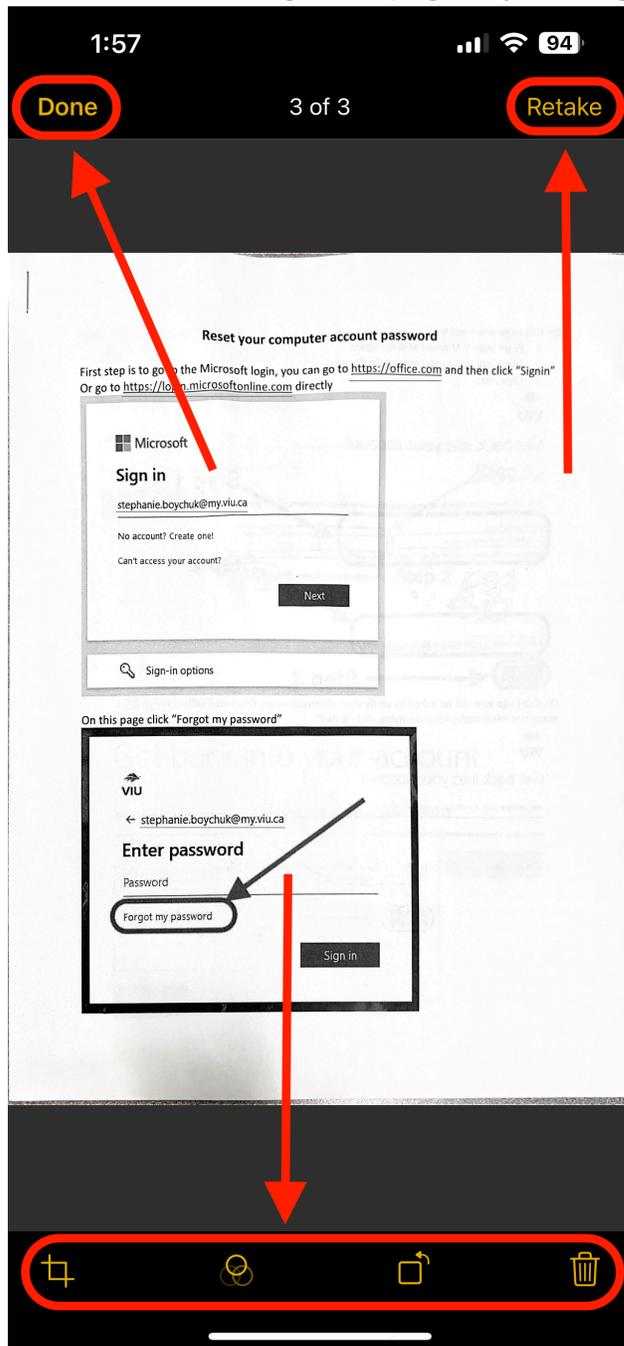

5. Click on the preview on the bottom left hand side to check the scanned pages

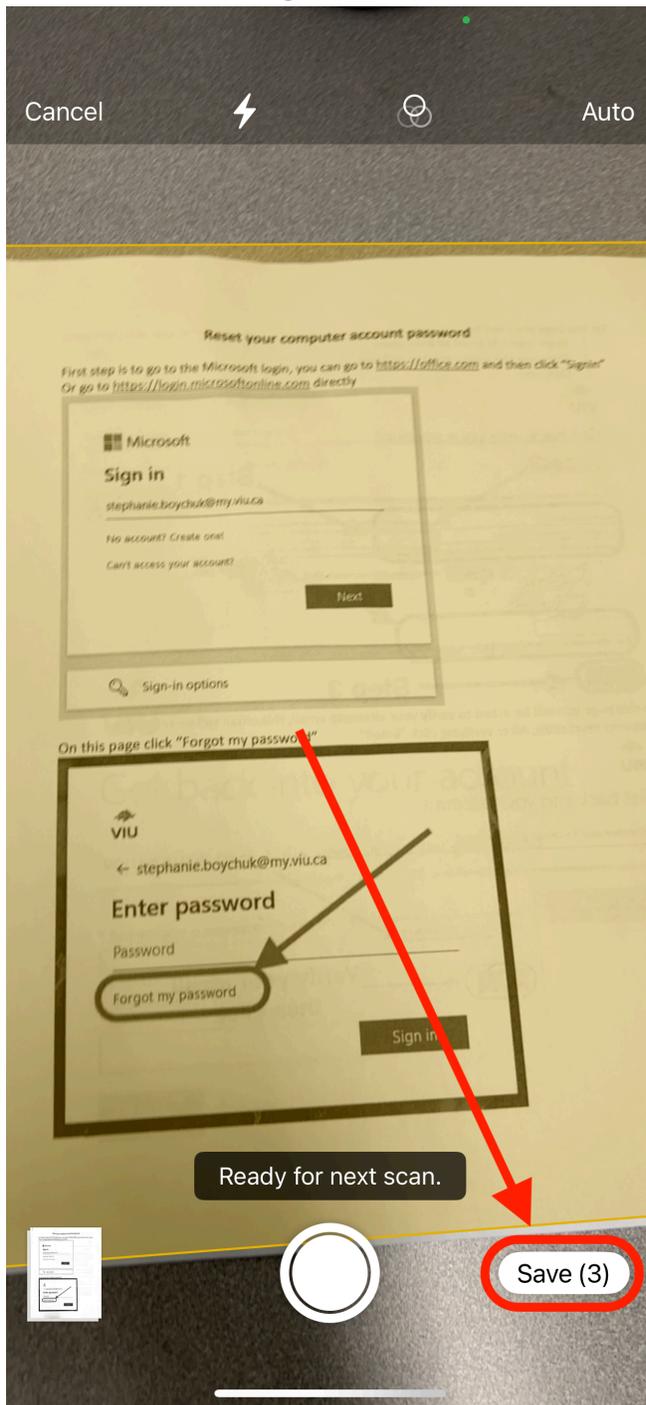

6. On this screen you can:

- Retake any pages by clicking "Retake" on the top right hand side
- Change the crop, filter, rotation or delete a page by using the bottom tool bar

- Go back to scanning more pages by clicking "Done" on the top left hand side

7. Once done scanning click on the "save" button on the bottom right hand side

8. Now you can share, save or print the pdf file by clicking the down arrow next to it's name
