

ASTR 112

SPRING 2027

DEPARTMENT OF PHYSICS, ENGINEERING AND ASTRONOMY

COURSE OUTLINE

ASTR 112
INTRODUCTORY ASTRONOMY:
Stars and Galaxies

INSTRUCTOR: Greg Arkos
OFFICE: Building 315, Room 209
OFFICE HOURS: TR 1:00 pm - 2:30 pm *or by appointment*
PHONE: (250) 753-3245 & ask to be transferred to me OR MS Teams calling
EMAIL: gregory.arkos@viu.ca
WEBSITE: <https://wordpress.viu.ca/arkosg/>
VIULEARN: <https://learn.viu.ca>

LECTURE: TR 2:30 pm – 4:00 pm Bldg 315, Rm 216
LAB: R (bi-weekly) 6:00 pm – 8:00 pm Bldg 315, Rm 216/113

TEXTBOOK: Universe: Stars & Galaxies by R. Freedman & W.J. Kaufmann (5th Ed, WH Freeman & Co.) is **optional**. Planetarium software is **required**. A **free** Astronomy reference text is also available online via *OpenStax.org*.

CALENDAR DESCRIPTION: Introduction to the fundamental principles of astronomy. Topics include telescopes, properties of the Sun, general properties of stars (stellar birth, evolution, death), black holes/relativity, the interstellar medium, the Milky Way and other galaxies, extraterrestrial life, and theories of the origin and evolution of the universe. Includes a bi-weekly lab and observing sessions, weather permitting. (3:0:1)

OBJECTIVES & LEARNING OUTCOMES: Astronomy 112 explores the nature of light, telescopes, our Sun, stars, stellar development, black holes, and galaxies. The course aims to provide students with an appreciation of the universe and our place within it, stressing conceptual understanding with minimal mathematical derivation. Quizzes and exams emphasize descriptive material and an understanding of (and connections between) course concepts. By the end of the course students should understand the fundamental nature of scientific investigation, understand how a telescope functions and be able to use one, discuss the life cycle of stars in detail, characterize stars using an H-R diagram, calculate stellar distances by a variety of methods, discuss the evolution of stars of varying mass, specify the processes by which stars die and identify the resulting stellar corpses, distinguish the components of a typical spiral galaxy, and categorize the major types of galaxies based on their visible light morphology. Completing the observing project and outdoor observing sessions should enable students to identify asterisms, constellations & other significant celestial objects and navigate the night sky.

PREREQUISITES: Minimum “C+” in one of *Pre-calculus 12, MATH 145 or MATH 152*.

ASTR 112

SPRING 2027

**** Please read ALL of the important course details & policies which follow. ****

STUDENT RESPONSIBILITIES: Read this course outline *carefully*; it is assumed that you are **fully aware** of its contents with regards to dates & deadlines, evaluation and policies. You are responsible for keeping up with material presented in lecture and monitoring your progress in the course. *Please speak with me **immediately** if you are having difficulties which might impact your grade in the course.*

OFFICE HOURS: I will be available for face-to-face meetings on a drop-in or by-appointment basis in my office during the formal office hours listed above. You may also reach me via the provided email and phone number both during and outside of my office hours. It is also possible to arrange individual or small-group meetings via Microsoft Teams (see the link on the course website).

LABS & OBSERVING SESSIONS: Students in astronomy will be expected to perform a number of astronomy related laboratory experiments over the course of the term; some of these will be computer based. Observing sessions take place (weather permitting) during the semester. **** Dates and times for observing sessions are TBD. ****

OBSERVING PROJECT: The observing project is done individually and utilizes computer simulations & TBD VIU rooftop observation sessions. Details are available on the course website. **** Late projects will NOT be accepted. ****

EVALUATION: Term Test #1 (in class)30%
 Term Test #2 (exam period)30%
 Quizzes (best 5 of 6)10%
 Laboratory (5)20%
 Observing Project10%

GRADES: Final grades are assigned using the *VIU Institutional Grade Scale*:

<i>A+</i>	90-100%	<i>B+</i>	76-79%	<i>C+</i>	64-67%	<i>D</i>	50-54%
<i>A</i>	85-89%	<i>B</i>	72-75%	<i>C</i>	60-63%	<i>F</i>	0-49%
<i>A-</i>	80-84%	<i>B-</i>	68-71%	<i>C-</i>	55-59%		

FAILING GRADES: Students worried about poor grades should speak with me as soon as possible. Please see the online VIU Calendar regarding registration related policies. **** The last day for academic penalty-free voluntary withdrawal is below. ****

ACADEMIC INTEGRITY & POLICIES: Academic misconduct can have **significant** repercussions on your academic career and is taken **very seriously** at VIU. Details of VIU’s General Regulations, Policy 96.01 and Procedure 96.01.001 are available from: <https://www.viu.ca/registration/general-regulations>, <https://learningmatters.viu.ca/ready-set-go/academic-integrity>

GENERATIVE ARTIFICIAL INTELLIGENCE: Students are expected to submit their *own work & ideas for this course*; the *usage and scope of ANY form of AI generated content or imagery* in submitted work **MUST** be pre-approved by the instructor & fully referenced.

EDI & CODE OF CONDUCT: VIU values human diversity in all its dimensions and is committed to achieving and ensuring learning and working environments that are equitable, diverse and inclusive. *It is expected that students will treat one another and the instructor with respect and dignity at all times, without exception.*

ACCESSIBILITY SERVICES: VIU's Accessibility Services provides information, support services and reasonable accommodation to students with documented permanent and temporary disabilities, such as mental health conditions, ADHD, learning disabilities, chronic health issues, hearing and visual impairments, physical disabilities and temporary impairments due to accident, illness or injury.

If you have a condition requiring academic accommodations for this course please contact Accessibility Services at AccessibilityServices@viu.ca or visit them in BLDG 255. ***** If you are already registered with AS please provide me with your accommodation letter, either in person or by email. *****

It is the student's responsibility to be aware of & meet all AS deadlines!

**** IMPORTANT course policies – PLEASE READ CAREFULLY ****

- 1 Concerns regarding graded material MUST be raised within a week of its return.
- 2 Late submissions will NOT be accepted for grading WITHOUT prior approval.
- 3 There are NO deferred or make-up quizzes for this course.
- 4 There will be NO “extra” or “make-up” work for this course.
- 5 Requests for exam deferments REQUIRE official supporting documentation.
- 6 Students MUST be available for the entire term, eg. the ENTIRE final exam period.
- 7 There will be NO accommodation of non-university related travel, eg. vacations.
- 8 There is ZERO tolerance for academic dishonesty, including plagiarism.

IMPORTANT DATES:

FIRST DAY OF CLASSES: January 5, 2027
WITHDRAWAL DEADLINE: Mar 26, 2027
LAST DAY OF CLASSES: April 9, 2027
FINAL EXAMINATIONS: April 12 – 21, 2027

HOLIDAYS: (No classes, labs or exams)

FAMILY DAY: February 15, 2027
STUDY DAYS: February 15 – 19, 2027
GOOD FRIDAY: March 26, 2027
EASTER MONDAY: March 29, 2027

TENTATIVE QUIZ, EXAM & OBSERVING PROJECT DATES:

Quiz 1	Intro, Navigating the Spring Sky	Jan 14
Quiz 2	Light, Atoms, Spectra, Telescopes	Jan 28
Quiz 3	Sun, Stars	Feb 11
Term Test #1	Intro – Stars	Feb 25
Quiz 4	Blackbodies, HR, Distance Ladder	Mar 11
Quiz 5	Protostars, Low mass stars, wd's, plan nebulae	Mar 25
Observing Project	due	Mar 26
Quiz 6	Supernovae, BH's, Milky Way	Apr 8
Term Test #2	Stars – Quasars/AGN	Final Exam period

TENTATIVE LAB DATES:

Lab 1: Skycharts	Jan 14
Lab 2: Spectra	Jan 28
Lab 3: Photometry of the Pleiades	Feb 11
Lab 4: Distance to the Galactic Core	Mar 11
Lab 5: Galaxy Classification	Mar 25

TOPICS: The following is a *tentative* list of topics that will be covered in this course.

<u>Subject</u>	<u>Chapter(s) in text</u>
Introduction, Navigating the sky	1, 2
Light, Atoms, Spectra & Telescopes	5, 6
The Sun	16
The Nature of Stars	17
Birth, Evolution, and Death of Stars	18 – 20
Black Holes	21
The Milky Way	22
Galaxies	23
Quasars, AGN	24

**** NOTE: Circumstances may require modifications to the dates & topics in this outline. ****
