

MAKING ASSESSMENTS MORE FLEXIBLE & ACCESSIBLE

VARIETY OF ASSIGNMENTS

Consider having a number of different types of assignments. This provides students with different opportunities to demonstrate their knowledge.

CHOICE WITHIN ASSIGNMENTS

If format is not part of a course learning outcome, allow choices for how students communicate their knowledge.

Presentations, audio or video recordings and infographics are a few options they can choose from.

WEIGHT DISTRIBUTION

Allow students to determine how much each assignment will be weighted based (within a range) based in their preference.

DUE DATES

Is there room for flexibility for when assignments are due? Think about negotiating due dates as a class at the beginning of term.

SELF-DIRECTED ASSIGNMENTS

Is it possible to have some assignments self-directed? Can students be supported in designing and completing their own assignments ?
